### A Playground in Quebec

#### PAUGAN FALLS, IN THE GATTINEAU DISTRICT

Canada bids fair to become in the near future the playground of the world. Ours is pre-eminently a country of natural resources—industrial, agricultural, and recreational—and not the least among these are our park areas, vast tracts of land that are not suitable for agricultural operations, not required for manufacturing purposes, nor needed for population settlements.

Such a region is that one called "the Gattineaus," 18,000 square miles of mountainous grandeur that rival the Catalinas for scenery, Olympus for atmosphere, and then which there is no more alluring field for sportsmen than this side of the happy hunting ground. The Gattineau district is a natural park, a treasure and already half opened, with a railway and a motor road, which through far from perfect at the time of writing is used by an increasing number of tourists.

The country offers a life as strenuous as the pioneer demands, or as restful as the jaded urbanite dreams of, but despite of obtaining, Canada is gradually awakening to the commercial value of her park areas, her playgrounds; to the fact that she has something that other countries—countries settled before she need for "national lungs" was

recognized—lack. She is beginning to realize that an amazing increase in motor traffic necessitates the providing of some objective for tourist travel, and that the more attractive the objective, the greater the number of tourists. Tourist revenue, and a very satisfactory type of revenue, for in enjoying and benefiting by a resort in one of our playgrounds, they leave the scenery undiminished in grandeur, and they take away nothing that impoverishes the country. So keenly are many cities competing for this tourist traffic, that they provide camps for motorists and via with one another in offering attractions that may induce a brief sojourn at least, within the municipality.

The Gattineau is like a hen waiting to lay golden eggs and sending only a little bit of corn in front of her to act the machinery in operation. The corn in this case, stands for adequate accommodation. The absence of hotels has been for the lovers of the Gattineau one of its principal charms. There has been no danger from invading hordes capable of despoiling its vast solitude with jaded bands and lakeside, and building picture houses

#### Bow Island

The W. A. of the Bow Island G.W.V.A. are to be heartily congratulated on their Patriotic work in selling the Red Poppies on "Red Poppy Day" Friday 11th. November, these Ladies worked with such earnestness that they had all sold out by dinner time and we feel sure that they would have sold three times the quantity if it had been available.

The Bow Island G. W. V. A. held a very successful Banquet last Saturday night in the Queen's Cafe. Piper McLellan, V. C. of Winnipeg was one of the guests.

Many good speeches were given and hearty songs indulged in, when the song "Auld Lang Syne" brought the Banquet to a close.

Ambulance Day was observed by the Bow Island G. W. V. A. last Friday. Piper McLellan, V. C. presented a flag from the W. A. to the Veterans of Bow Island, there were four yellow leaves on the flag to commemorate the four men from here who lost their lives in the war.

The G.W.V.A. Hall was crowded, at least eighteen tables being taken up by Whist players.

Mrs. E. Anderson gave some fine renderings of various songs which were heartily applauded, after that, Piper McLellan, V. C. sang and was heartily encored.

Dancing then started and was kept up for the balance of the evening, the only break being for lunch.

**"STOP PRESS NEWS"**  
Special to the Review,  
see them on middle page

Last Wednesday evening, the Ladies Aid of All Saints Church, gave a well attended Card Party, thirteen tables being in play. The Rev. Learcroft of Talbot was on hand for this occasion, brought the pipes with him.

Ladies First Prize Miss Viola Duffy Gents First Prize Mr. E. Thompson Ladies Booby Prize Mrs. A. Hobson Gents Booby Prize Rev. Learcroft.

A fine lunch was served by the ladies and all report a very joyous time.

Dr. Cairns was called out on Monday night, to attend Mr. and Mrs. Bruce Marsden's baby, who is very sick with Bronchial Pneumonia, it safely passed through the night owing solely to the skill of Dr. Cairns.

Mr. T. R. Blaine left on Tuesday night for Edmonton, to attend the Druggists Convention there.

The Curling and Skating Rinks are not progressing very fast owing to the stormy weather which has put a stop to building operations at present.

Miss Esther Hagen of Seven Persons is now living with Mr. and Mrs. Hagen of Bow Island and is attending our school.

The United Ladies' Aid will give a Chicken Supper and Bazaar, Thursday Nov. 24th, at the G.W.V.A. Hall.

The Bazaar will open at 3 p.m. Supper at 8 p.m.

Programme at 8:30  
Supper Adults 50c  
Everybody Welcome

Mr. and Mrs. Tunstall entertained last Sunday to supper Mr. and Mrs. J. Perry and their grandchildren.

Mrs. Ridgefield and Mrs. Hobson made a trip to Medicine Hat last Saturday, returning the same day. Mrs. Peever took care of Mrs. Hobson's baby in her absence.

**Mrs. J. R. MILLAR**  
Is now open for Orders in Hosiery Ladies', Gents' and Children's Hosiery made to Order at reasonable prices. Customers please supply your own yarn.

Also have a few Gents Light Grey All Wool Socks in stock at 70c. per pair Box 94 Bow Island

# Explorers Will Find The Use Of Airplanes To Be Of Great Advantage

Regarding Mr. Francis Little's proposed trip of aerial exploration of Central Australia, by which he expects to gain more information in five weeks than the best equipped expedition could obtain by the use of Mr. Lee Walmsley, M.C., F.R.G.S., says: "Mr. Little's too optimistic! That trip, even for making a rough map of a new country, for tracing the course of mountain ranges, rivers, the boundaries of desert, forest and bush, for noting the whereabouts of water and grazing grounds, already manned by skilled observers are unequalled. A strong ground expedition exploration is complicated affair. There are few countries where it is possible to employ mechanical transport for the carrying of food, camp equipment, and the carrying of mail. This entails the hiring of porters, and consequently the carrying of more men and mules than can be fed. This also applies to animals if these are used. Porters and animals are subject to disease, which may mean mortal loss of life."

By the very nature of their task, such explorers must acquire a knowledge of the physical conditions. Mountains must be climbed, rivers bridged, swamps negotiated, forests hewn through.

A strong mule in broad daylight may be a party for a month, the white members are exposed to malaria. An expedition will cross the equator, and more important still, its occupants will have a perfect view of the whole swamp, and be able to take its boundaries straight into the hands of their map.

In very flat, bush-land country, for weeks and the ground appears to be never so much than a few yards apart. Thus he may die of thirst while he has passed within rifle shot of hidden springs and rivers. The airman's view, however, is usually limited only by the curving of the horizon, and the area of ground he is able to survey in a few hours' flight is therefore enormous.

What geographical information can the airman explore obtain?

In addition to that mentioned above, a trained observer can, by noting certain associations of vegetation, due through the presence of water. In forests he can identify trees of commercial importance. A good geologist should be able broadly to identify formations and the presence of mineral bearing strata. Hidden agricultural strata should be easily distinguished from the stone paths, native habitations are clearly seen, so are the water banks and reefs in seas, rivers and lakes.

As proof of the value of the aerial plane in this connection: During the late campaign in East Africa, General Northey had planned a long march into Portuguese territory. That map available was quite unreliable. But in three flights were able to supply a survey of his projected route, and two aircraft ground the detailed information regarding the density of the vegetation, depth and width of rivers, the nature of the soil, whereabouts of waterholes and villages, extent of native crops, and the disposition and strength of the enemy's forces.

**Twenty Years Ago**  
Twenty years ago women were regarded as the chattels of their husbands. Twenty years ago a woman could not be a soldier or a barrister. She could not even ride astride on a horse without exciting unfavorable comment. There had been a war since then. The qualifications of women have been blown to pieces by the guns on the British front.—London Daily Express.

**From the Dead Sea**  
Bitterness is gathered in Palestine from the Dead Sea, where it is found floating on the surface. Prior to the war this bitumen was gathered and used as a preservative for oil. It was used in Jerusalem, who in turn, exported it by special permit. Practically the entire output went to Germany, where it was used in preparing the glass of patent lens.

**Wireless Sets Sold**  
Among the unclaimed goods auctioned off at a police sale in Toronto, were four sets of wireless apparatus confiscated by the police from foreigners in 1917, when the police were engaged in preventing the enemy from gaining knowledge that might be of material assistance.

**The Leggers**  
Milly—Men live faster lives than women.  
Bully—Perhaps you are right. At any rate it takes a woman more time to reach the age of thirty than it takes a man.—New York Sun.

W. N. U. 1291

## Loneliest Spot in British Empire

Captain of Pacific Line Says It Is Farthest Island  
The loneliest place in the British Empire? Captain Galloway, of the Pacific liner Caracava, who knows the world well, believes that it is the Falkland Isles. "There is not much to do there," says the captain. "There is a golf course and one plane. The club was put ashore by the Good Hope before she went out to meet Von Spee's squadron. There is no cinema film, which is a pity. The town hall now the Captain Galloway brought away the Government printer from the Falklands, who had become mentally afflicted owing to the loneliness."

## By-Products From Apples

Entirely New Industry Recently Started in Nova Scotia

What may prove to be a valuable discovery has been made at Antigonish, Nova Scotia, in a method of extracting by-products from waste and other waste products. It has been found that even the most intensely acid and usually worthless apple may be so treated by a simple process as to yield syrup which has been pronounced extremely desirable as a basis for other concoctions not hitherto so well supplied. And not only is this syrup valuable but another by-product has become evident in deposits of calcium lactate, the same article as is derived from maple syrup and known as sugar sand. Before the war the Germans bought this extensively in Quebec at about six shillings or more per pound, as a source of malic acid. The process is being treated in two evaporators, and may be the development of an entirely new industry in Nova Scotia.

## Claims Discovery of Life Elxir

Men Over 100 in Kiev Village Eat This Food Exclusively

The elixir of long life consists of sour cream, milk, cheese made from sheep's milk and known as sugar sand. Before the war the Germans bought this extensively in Quebec at about six shillings or more per pound, as a source of malic acid. The process is being treated in two evaporators, and may be the development of an entirely new industry in Nova Scotia.

Many persons transported here from the families of soldiers in Russia, are suffering from the mountain, where this food is to be had in abundance.

## He Had a Come-Back

"You have such strange names for your cows," an Englishman remarked to one of his new American friends, according to Harper's Magazine. "Hawken, Holchen, Fugkeggle and even so many others." "I suppose they do sound queer to English ears," said the American thoughtfully. "Do you live in London all the time?" "Oh, no," said the unsuspicious Briton. "I spend a part of my time at Chipping Norton, and then I've a place at Folsom in the hills."

One of the latest variations for women is that of the professional house hunter.

The brown juice of "bitternail" bark is used in some instances for staining cloth.

The home rule party in this country consists of women.

## DESIRABLE CANADIANS

**No Change Since Abraham**  
The Arab, or native Syrian population, seems to have developed no fundamental changes for more than 4,000 years, according to Mr. Henry Pawett, who has been touring in Palestine. He says that the same ploughs were used by their forefathers in the days of Abraham.

**Civilization Primal Basis**  
They are baring down for food in the Western World, and the hundreds of thousands of people are dying for lack of it. Truly transportation and distribution are the primal basis of civilization. Without them we would live—and die—like the savage tribes of Africa.—Chicago Evening Post.

**Eventually**  
Most people will agree with President Harding that war between the United States and England is unthinkable, and eventually most people will agree that war between two nations is unthinkable.—St. Louis Post-Dispatch.

In England many railway stations are marked with the name of the town they represent in big white letters on the roof, as a guide to alien.

## Livestock Improvement Measures

Better Types on the Farm  
More and more the movement is going for the elimination of the scrub sire in the beef and dairy breeds is being emphasized and pushing forward. In addition to the extensive campaigns being carried on in Ontario, Saskatchewan and elsewhere by the provincial authorities, the policy of the Dominion Department in distributing pure-bred bulls in newly settled areas is doing much to improve the quality of the breeding stock. The policy was adopted in 1912, and, up to November 1, of last year, not more than 2,500 bulls had been introduced in this way by the Dominion Livestock Branch. At the date mentioned, the branch had in the hands of different associations in Canada and newly settled districts 1,200 bulls, of which number 750 were Shorthorns, 217 Ayrshires, 99 Holsteins, 12 Herefords, 33 Aberdeen Angus, 25 Friesians, 17 Jerseys, 10 Galloways, 2 Red Polls and 1 Galloway. Alberta is credited in the one year with 315 of these bulls, Saskatchewan with 295, Manitoba with 137, British Columbia with 71, Quebec with 246, Ontario with 95, Nova Scotia with 24, New Brunswick with 35, and Prince Edward Island with 10. At all the bulls were secured by the branch direct from the breeders, but some were acquired through the provincial sale, purchases are now made in the open market. For instance, at the seven auction sales in the province, the livestock held last year, 225 superior animals were purchased for distribution in this way.

## Getting Iron From Rust

Man Achieved Greatest Triumph When Process Was Discovered  
It is outside of our time to give to your blood its brilliant red color. If blood contains no low iron, men and women would look like walking corpses. Nowhere in nature is iron found in "native" or pure state. It occurs only in the form of oxides—that is, as iron rust. Man's greatest triumph was achieved when he discovered how to "undo" iron rust. At present, our civilization today would be no further advanced than that of ancient Egypt or Assyria.

Edwin E. Slosson, in his remarkable new book, "Creative Chemistry," says that every year the latest advances of the world result 72,000,000 tons of iron from its oxides; and every year one-fourth of that quantity reverts to iron from its oxides. In this direction for a generation, there would be little left to show except the ruins of our civilization.

# Would Bring Remains Of Nameless Hero From France To Ottawa

## Dairy Business Profitable

Earl's Sister Turns Hobby Into a Paying Business

An earl's sister who took up farming as a hobby eventually found it profitable. In addition to the extensive campaigns being carried on in Ontario, Saskatchewan and elsewhere by the provincial authorities, the policy of the Dominion Department in distributing pure-bred bulls in newly settled areas is doing much to improve the quality of the breeding stock. The policy was adopted in 1912, and, up to November 1, of last year, not more than 2,500 bulls had been introduced in this way by the Dominion Livestock Branch. At the date mentioned, the branch had in the hands of different associations in Canada and newly settled districts 1,200 bulls, of which number 750 were Shorthorns, 217 Ayrshires, 99 Holsteins, 12 Herefords, 33 Aberdeen Angus, 25 Friesians, 17 Jerseys, 10 Galloways, 2 Red Polls and 1 Galloway. Alberta is credited in the one year with 315 of these bulls, Saskatchewan with 295, Manitoba with 137, British Columbia with 71, Quebec with 246, Ontario with 95, Nova Scotia with 24, New Brunswick with 35, and Prince Edward Island with 10. At all the bulls were secured by the branch direct from the breeders, but some were acquired through the provincial sale, purchases are now made in the open market. For instance, at the seven auction sales in the province, the livestock held last year, 225 superior animals were purchased for distribution in this way.

She is Lady Victoria Murray, the Earl of Dunmore's sister, and the farm—300 acres—is at Whiteley Bay, near Macleod, Quebec.

Lady Victoria has a herd of 110 Shorthorn and Friesian dairy cattle, and has dispatched by motor and train some 40,000 gallons of milk during the year.

From the model poultry farm, 160,000 eggs have been shipped to market, besides large quantities of dressed poultry.

As a result of store milk, Lady Victoria shows excellent judgment, and is the possessor of some notable pedigree stock.

## Lloyd George's Intuition

Proved Correct Many Times During the War

He was a "right-minded" man who, throughout the great war, was the captain of victory to his fellow-countrymen—and, one might almost say, to the world. In the most crucial periods of the conflict, he consistently exhibited a spirit that never faltered, a courage that never failed. He seems never, for a moment, to have doubted of the ultimate triumph of the allied cause, and (what is perhaps, more surprising) to have continually displayed, according to the testimony of those close to him at the time, a very accurate comprehension of the German mentality. Lord Lloyd George's intuition was, in fact, time after time, his intuition proved correct, when the judgment of generals in the field was at fault.—Montreal Journal of Commerce.

## Prince Will See Wrestling in Japan

Will Arrive at Time Sport Is Indulged in

When the Prince of Wales arrives in Japan next spring he will, say the New York Times, be three just at the time of the year when the Japanese make a most keen interest in wrestling and champions are made and unmade. In the fifth century wrestling actually settled the succession to the Japanese throne, as the Emperor had died leaving two sons both equally anxious to occupy the vacancy.

## Do It Now

Putting Off Things Will Hinder Results in Business

Each of us can help to hasten results in business and in employment. How? Well, there is that little improvement you have long wanted to carry out around your home or your place of business; do it now. Where it concerns you have had in your mind for quite a while but have held back because the price was too high, dream of building your home has heretofore not been realized because of this, that or the next reason. Do it now. You have been saving money to invest it safely and profitably; invest it now. You have been waiting for the right opportunity to launch that more aggressive plan for developing your business; do it now. You have been feeling pessimistic for many months but that yourself half inclined to let the more cheerful and courageous attitude; do it now.—Purves Magazine.

## Drilling In Belfast

Sinn Féin men have been drilling in the Upper Falls district of Belfast for some time past, and on Oct. 2 they had what appeared to be a full day.

About 150 men assembled at the corner of Springfield road and Wiltshire road and marched in single file formation to Hamamstead, where they were joined by other parties, and various evolutions were practised. A passerby who had the temerity to stop and watch the proceedings, was assaulted by some of the men and ordered to go away a command he obeyed with alacrity.

## Best Kill Team of Horses

Deer are reported to have hung to death a team of horses belonging to a farmer at Morton Grove, near Chicago. The farmer was driving the team, and while passing near one of his lives a farm hand knocked it over. The team was then driven to the barn, and they covered the horses. They were driven off by water from a hose, but both horses died from their injuries.

## Grave Becoming Extinct

The grave is gradually disappearing in some parts of Africa. Where it was no common thing to see herds of eighty some years ago, it is now a rarity to see a herd of more than twenty.

## Illusion Shattered

Stage Hand (to manager)—Shall I lower the curtain, sir? One of the lion tames has got the "coup-de-patée" (London).

## How to Buy a Motor Car

An interesting statement was made by Sir Robert Buckle at a meeting of the Upper Conservancy, London, England, when he remarked, "We are buying another motor car, and if we are as lucky with this one as we were with the last, we shall indeed be fortunate. We bought that car two years ago and ran it something like 10,000 miles, and then we sold it for a little more than we gave for it."

## Britain's Last Man in France

The last of the British troops remaining in France are expected to return to England soon. They are a party of about 100 men of the Royal Fusiliers (City of London Regiment) who have been on the work of examination of the bodies of our soldiers in preparation for their removal to British cemeteries abroad.

## Depth of Sunken Lake Unknown

The Great Sunken Lake, in the Cascade Mountains, is the most deeply sunken lake in the world. It is 10 miles long and four and a half wide. It is 2,000 feet down to the bottom of the water, but the depth of the water is unknown.

## When All People Agree

People disagree about everything, accepting that prices of things they have to sell are too low and the prices of things they must buy are too high.—Athletic Globe.

## It Pays to patronize home industry

It pays to patronize home industry, for from the merchants in your own town.

English children who recently came to Canada on board the "Empress of France." Their names are: Thomas Marshall Howard, Sydney, John Knick, Lawrence King, Edwin Coleman and Abby Coleman.

**"THE LATEST NEWS  
BY WIRE"**Special to the Review,  
see them on middle page**Burdett News**

On Saturday last the Burdett G. W. V. A. was represented by five of its members at a Banquet at Bow Island they report having a very pleasant and instructive evening.

Armistice Day in Burdett was duly honored with flags flying from the Customs Office and the G.W.V.A.

At 11 a.m. work ceased for two minutes in memory of our heroic dead. During the day the ladies of the R.A.S. sold poppies obtained from the National Poppies Day Campaign Headquarters, at the close of the day all Poppies were sold and many more could have been sold if they had had them.

A Dance was held in the evening by the G.W.V.A. which was a huge success many coming from Bow Island and Grassy Lake and other points.

Mr. H.M. MacLean, returned last Monday from the north where he had been looking around, on his return he decided to have a sale and then move to Portland, Oregon, U.S.A.

There will be a Card Party and Sale by the Catholic Ladies' of Assumption Church at Mrs. U. G. Enard, nine miles south of Burdett. Everyone is cordially invited to attend.

Supper will be served  
A Roast Turkey will be killed and sold cakes.

Next Saturday the 19th. Nov.

Mr. MacLean and a neighbor were Mr. Burdett visitors last Wednesday.

DUFF-LYON

At 414 First Street, Medicine Hat, a quiet wedding was solemnized when Mr. Peter R. Duff, of Burdett was united in the bonds of Holy Matrimony to Miss Elizabeth Lyon also of Burdett. The Rev. J. W. Morrow performed the ceremony, Thursday morning, November 10th.

**Auction Sale**

Don't forget the Auction Sale of H. M. MacLean, on the Ed. Warry farm, West 1/2 Sec. 33 Tp. 9 Rge. 11, 3 miles south and 3 miles East of Burdett on Thursday November 24th. 1921. Sale starts at 12 o'clock.  
D. M. Garrison—Auctioneer

The following were visitors to Bow Island on Saturday Morning: Leige, G. Lomas, R. Ostrum, A. Hamilton, J. Hamilton, F. Barnes, C. Henderson, C. Lindwall and C. T. McKinnon, last Tuesday.

The Ladies Aid of the United Church Burdett will hold their Annual Bazaar and Dinner and Supper on Saturday November 19th. 1921.

Admission to Dinner:  
Adults 50c. Children 25c.  
A Welcome to all

The Ladies of the United Church Burdett have spent many happy hours in the Parsonage on Thursday afternoons, the gatherings have been to them a bright spot in monotony of the weekly round of home cares. It gives them the opportunity of friendly and social intercourse. The atmosphere at these gatherings, is helpful, and one always feels better for having

spent the afternoon at the parsonage. During the year many articles of clothing and bedding have been made, also a large number of pieces of well finished fancy work have been accumulated.

The Snowdrop Girls spend an evening at the Parsonage every Friday under the leadership of the Pastor. During the year, the biographies of many of the girls of the Bible have been studied. This is usually followed by a practical talk on some subject of vital interest to girls. The latter period of each meeting is usually devoted to games, but for several weeks these bright little girls have been busy with needles and crochet hooks, preparing a table all their own, for the Grand Bazaar to be held on Saturday Nov. 19th.

Saturday Nov. 19th is the United Ladies Aid Grand Bazaar. That word Bazaar sounds like a big hungry name, but since the ladies have spent such a happy year together they would like to see everybody else happy too. And they believe one way of doing this is by giving everybody a good substantial Chicken Dinner. This Great Grand Bazaar Dinner will be already on Saturday at twelve-thirty on November 19th.
